From:

The consumption of added sugar has jumped 25 percent since 1984, squeezing healthy foods out of the diet. As a member of the Center for Science in the Public Interest (CSPI), I urge the FDA to establish a "Daily Reference Value" for added sugar of 40 grams and to require labels to disclose how much added sugar a food contains.

Please make
this much-needed
change in the
nutrition info
on labels. Con-
sciousness
needs to be
raised on bad
effects of too
much sugar in
the diet.
